PHYSICS Unit		Name:
INMOTION Sou gpb.org/physics-motion Note	nd Waves e-Taking Guide	Date:
Main Ideas, Key Points, Questions: After watching the video segment, write down key points, main ideas, and big questions.	Objective(s): <ul> <li>Understand why sound waves are cladingitudinal.</li> <li>Recognize how the speed of sound waves and temperature through which they</li> <li>Learn how the human ear interprets to sound waves.</li> </ul>	ssified as mechanical and aves changes based on the medium travel. he frequency and amplitude of to segment, use words, phrases, or

After watching the video segment, write at least three sentences explaining what you learned. You may ask yourself: "If I was going to explain this to someone else, what would I say?"

Date:

Answer the following.			
1.	Is a sound wave mechanical or electromagnetic?		
2	Is a sound wave transverse or longitudinal?		
۷.			
3.	Which part of the ear receives sound waves and turns them into electrical energy that travels to your brain?		

4. Label a compression region and a rarefaction region on the diagram below:

	A

- 5. If the speed of sound is constant, what happens to the wavelength of sound waves when their frequency increases?
- 6. How does the speed of sound change as it travels through different states of matter? Rank solids, liquids, and gases in order from fastest to slowest.
- 7. Why do sound waves travel faster through certain states of matter than others?

Unit 6B Notes and Questions

## Unit 6B Sound Waves *Questions to Consider*

Date:

Answer the following.		
8.	What is the equation that relates the speed of sound through air to air temperature?	
9.	When is a sonic boom created?	
10.	The frequency of a sound wave is interpreted as the of the sound.	
11.	What is the normal range of human hearing?	
12.	What property of a sound wave is related to loudness?
